# Konturra Is a Plug-and-Play Solution that Enables IT Companies to Offer New Services to Customers Using the Microsoft Azure Platform
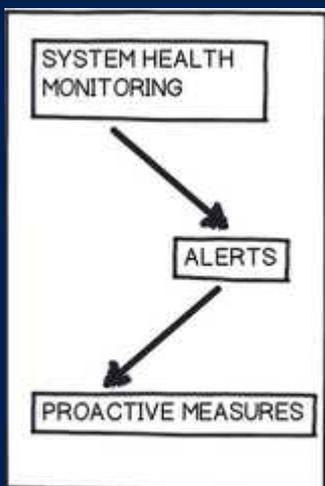

MICROSOFT AZURE ISV PROFILE: RAVERUS LTD.

Raverus is a customer-driven company engaged in providing software applications designed to improve and automate everyday business operations. Our guides in designing and programming are usability, simplicity, and innovation. More than 2,500 businesses use our solutions in their everyday work.
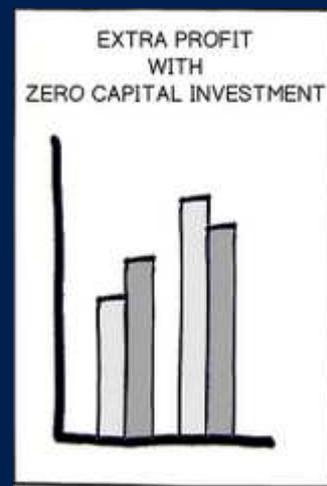

WHAT WE OFFER

Traditional backup repositories and storages are often not convenient or practical for safe and secure backup. Our online backup service allows IT companies to start online backup on end-user PCs with only one click. In addition, the IT company is on top of all backup processes, ensuring online backup runs continuously.

System health monitoring gives IT companies (mainly computer maintenance businesses) the ability to conveniently monitor and control critical system assets on a customer's PC. Technical support can act before possible system issues escalate, ensuring end users have little or no system downtime.

Online backup and system monitoring are managed through Konturra.com. The IT company can use the web portal to control all clients' computers, administer all policies, pricing, quotas, and alerts; generate reports about clients, devices, services, or actions; and track all communication with clients.

Konturra is a solution that allows computer maintenance companies, software development companies, or any company with clients who use computers in their everyday work to offer services that are useful and easy to implement. It all comes with no upfront costs, which means zero capital investment.

WHAT OUR CUSTOMERS ARE SAYING

"We welcomed your new online backup service enthusiastically because it will replace all of our additional external storages and everyday worries abut secured storage of our business data and make our lives easier." – G. Zagar, Suficit Ltd.

Microsoft

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
